

Eco Power Solutions Opens Sales and Marketing Demonstration Facility for COMPLY 2000

Grand Opening - Industry Leading Emission Control and Energy Recovery Technology Demonstration Facility Opens June 9th, 2010

LOUISVILLE, KENTUCKY – June 9, 2010 – Eco Power Solutions, a global leader in emission control and energy recovery technology for utility and industrial clients hosts its Grand Opening Event today showcasing Eco Power’s new Sales and Marketing Demonstration Facility in Louisville, Kentucky. The facility houses Eco Power’s flagship technology, the COMPLY 2000, and effectively simulates both the emission reduction and energy recovery capabilities of the COMPLY 2000 in a coal fired and gas fired electrical generation and industrial environments.

“Eco Power Solutions is the type of company that I believe represents the future of our city,” Mayor Jerry Abramson said, “Eco Power Solutions is an innovative company, doing cutting edge work, and I am glad to welcome them to Louisville.”

“Eco Power Solutions has long been an innovator and leader in the area of emission reduction and energy recovery technology,” said Tom Thompson, CEO of Eco Power Solutions, “and this state-of-the-art facility represents not only the culmination of years of research and development, but also displays at scale the practical application of the COMPLY units and the value proposition available to our client companies, whether the focus be on energy recovery or emissions reduction. We are proud to have this facility to showcase our leading edge technology”

“This new facility firmly puts Eco Power in the leadership position in our industry,” said Wayne Littleford, President and Chief Technology Officer of Eco Power Solutions. “This facility will play a tremendous strategic role in the delivery of our current and future technology advancements in the emission reduction and energy recovery sector.”

The COMPLY 2000 offers an integrated solution for clean, reliable power production at a significantly lower capital investment point for clients. The COMPLY 2000 is designed to remove greater than 96% of combustion emission pollutants such as nitrogen oxide (NO_x), sulphur dioxide (SO_x), Mercury (Hg) and Particulate (PM 2.5); as well as eliminating up to 25% of carbon dioxide (CO₂) from a variety of industrial and utility sources, including: coal, oil and natural gas fired boilers for both power plants and industrial manufacturing. The performance results of the COMPLY 2000 have been verified by the U.S. Department of Energy's test facility, Brookhaven National Laboratory, Environment Canada and by a third-party testing group.

About Eco Power Solutions

Founded in 2006, Eco Power Solutions is a leading developer and provider of a patented turnkey energy recovery and emission control technology, the COMPLY 2000, to utility and industrial clients. Eco Power Solutions technology provides a greater than 96% reduction in emissions (i.e. sulphur dioxide - SO_x and nitrogen oxide – NO_x, Mercury – Hg, Particulate – >PM_{2.5}), along with a 10% - 25% reduction in Carbon Dioxide (CO₂). Additionally, the company's technology is capable of generating supplementary energy by recovering waste heat that normally escapes into the atmosphere, thus providing a significant reduction in operating costs and increased energy reliability.
