

## **Eco Power Solutions Adds Industry Veteran to Lead Engineering**

**Louisville, Kentucky – United States – September 21, 2009**

Eco Power Solutions, a leading developer of energy recovery and emission controls technology, announced today the addition of Sanjeev Jolly as Vice President of Engineering.

As Vice President of Engineering, Mr. Jolly will lead the engineering and project implementation efforts worldwide for Eco Power Solutions. He is responsible for oversight, execution and commissioning of all project initiatives undertaken by the company and is a key member of the Eco Power Senior Executive team.

“Sanjeev brings the expertise and track record of a successful Engineering Executive at a leading technology-based solutions company. This strong combination of skills and experience will help us continue to provide value for our clients and build upon our market leadership position,” said Tom Thompson, Eco Power Solutions Chief Executive Officer. “On behalf of all my colleagues at Eco Power, we welcome Sanjeev and look forward to his contribution to our team”

Mr. Jolly has over 20 years of experience in power industry including design, performance testing and sales of HRSGs, gas turbine inlet air cooling systems and emission controls for wood and coal-fired units. He has an M.S. in mechanical engineering and MBA from University of Kentucky. Prior to joining Eco Power Solutions, Mr. Jolly worked in several positions including Project Manager, Regional Sales Manager and Senior Design Engineer for Vogt Power International and as Technical Director for Caldwell Energy.

“Energy sustainability and controlling emissions is a top priority for corporations, consumers, and countries. I’m excited to bring my passion and experience in power engineering to a pioneer like Eco Power Solutions, a true innovator in the convergence of energy recovery and emission control technology,” said Jolly. Reporting to Tom Thompson, Mr. Jolly assumes the role of Vice President of Engineering effective immediately.

### **About Eco Power Solutions**

Eco Power Solutions is a leading developer and provider of patented turnkey energy recovery and emission control technology, COMPLY 2000®, to utility and industrial clients. Eco Power Solutions technology provides a greater than 96% reduction in emissions (i.e. sulphur dioxide - SO<sub>x</sub> and nitrogen oxide – NO<sub>x</sub>, Mercury – Hg, Particulate – >PM<sub>2.5</sub>), along with a 10% - 25% reduction in Carbon Dioxide (CO<sub>2</sub>). Additionally, the company’s technology is capable of generating supplementary energy by recovering waste heat that normally escapes into the atmosphere, thus providing a significant reduction in operating costs and increase energy reliability.
