

## Media Advisory

### Eco Power Solutions Available to Media during Clean Technology Trade Mission to India with Ontario Government

**OTTAWA, Ont - December 7, 2009** - Representatives of Eco Power Solutions will be available to the media while they join Ontario Premier, Dalton McGuinty on a trade mission to India. The Mission will highlight the Province's clean technology sector in New Delhi, Mumbai and Hyderabad between December 6<sup>th</sup> and 11th. Eco Power Solutions, a North American developer and provider of a turnkey energy recovery and emission control technology, joined the Mission to investigate potential business opportunities, establish relationships with government officials, potential customers and strategic alliance partners.

The Indian market will represent almost \$500 billion over the next five to six years as it improves its infrastructure in the areas of energy generation, environmental protection and urban development.

Eco Power Solutions' ([www.ecopowersolutions.com](http://www.ecopowersolutions.com)) technology provides a greater than 96% reduction in emissions (i.e. sulphur dioxide - SO<sub>x</sub> and nitrogen oxide – NO<sub>x</sub>, Mercury – Hg, Particulate – >PM<sub>2.5</sub>), along with a 10% - 25% reduction in Carbon Dioxide (CO<sub>2</sub>). Additionally, the company's technology is capable of generating supplementary energy by recovering waste heat that normally escapes into the atmosphere, thus providing a significant reduction in operating costs and increase energy reliability. The Company has offices in Stittsville, Ontario, Quincy MA, and Louisville KY.
